

# The Knee Walker

Model # TKW-12

We love The Knee Walker because being on the go ... while recovering from foot/ ankle/Achilles injury is long, uncomfortable and very inconvenient. Stay mobile and recover better with the non-weight bearing The Knee Walker, equipped with locking hand brakes, rugged wheels and a strong frame that supports up to 300 lb. It's going to be a long 6-12 weeks ... suffer less and move more.
