

Heavy Duty Knee Walker

Model # TKW-13

We love the Heavy Duty Knee Walker Because being on the go...while recovering from foot/ankle/ Achilles injury is long, uncomfortable and very inconvenient. Stay mobile and recover better with the non-weight bearing Knee Walker, equipped with locking hand brakes, rugged wheels and a heavy duty frame that supports up to 400lb. It's going to be a long 6-12 weeks ... suffer less and move more.
